Subject: Absolutely brilliant on RHAT's part!

YES,

Make MSFT really pay in full! I don't get it how a \$0.25 CD can qualify as \$100. Keep education free, even in the US, there needs to be freedom of the kids to learn a real OS. I'm grateful for having Unix as my first (and present) OS.

Fair is fair. Microsoft forks over the true cost in hardware and the 'punishment' (well deserved) is they are NOT allowed to use their software in American schools.

Allready, here in Europe, Microsoft is losing this area quickly and they never really had the classroom in the first place.

PLEASE, PLEASE show a bit of respect for your education systems by keeping Microsoft out of the classroom!

Thankyou -- If anybody read this
